Technology

- Scale
- Reliability
- Variety
- Cost
- Carbon

Finance & Delivery

- Risk
- Commercials
- Subsidies
- Programme
- Delivery capacity & skills

National Synergies

- Generation, Storage, Use
- Local solutions
- National resilience?

When? Where? How?

- At what point does technology become proven?
- How do translate pilots into a scaleable, resilient, affordable national heating system?
- What needs to happen for successful projects to be bankable?
- How do we capture the learnings from other infrastructure investment programmes?
